

# SERVING OUR PURPOSE OF KEEPING SOCIETY SAFE, THE AERODYNE™ SWITCH SYSTEM SENSES EMERGENCY EVENTS AND TRIGGERS EMERGENCY LIGHTING AND BLACK BOX BEACON.

The Aerodyne™ impact switch assembly is used on business jet aircraft and helicopters to turn the power on to voice/data recording, fire control, aural tone warnings, and emergency lighting systems in response to unexpected acceleration and impacts.

The hermetically sealed patented system is designed to be impervious to moisture and sand and to continue to function reliably for the full life of the aircraft.
